You can use these to nudge an opponent vehicle coming alongside you. As you race around the track the three circles will each begin to fill up in a white colour, when the barge is ready to be used the circle will turn red. A maximum of three barges can be gained.

③ Lap Counter

⑥ Current Speed

⑦ Car Alert

Small directional arrows that appear to the left, right and behind your vehicle that indicates approaching cars.

RACE INFORMATION

As you race around the track there are a number of things to look out for that can help or hinder your race.

Track Attributes

These are the coloured lines that appear in the track lanes. Passing over these attributes will affect the vehicle in the following manner.

Red lane: Slow down

Green lane: Speed Up

Yellow lane: Lane Lock

Blue lane: Magnetic

Power-ups

When collected during the race the green icon will give you one of the following items. Pressing the X button activates the items you have collected.

Boost Gives your car a burst of high speed for a short duration. Be careful when using this as you cannot slow down whilst it is in use.	
Lane Lock When activated will lock all opposing vehicles in their lane for a five second duration. Note: If Lane lock is used against you, an icon will appear in the centre of your screen with a five second countdown timer indicating the duration of the effect.	
Charge A bolt of energy that flies along the lane until it hits something (hopefully your opponent). Pressing the X button can fire the charge forward. To fire the charge backwards reduce speed slightly and press the X button or press and hold the ○ button and press the X button to fire whilst looking behind.	

Jump Use this to jump over a barrier. Hint: Keep hold of this item and if you are lane locked and you don't want to slow down for the approaching barrier. Simply jump and keep going!	
Mine Drops a mine directly behind you. Hint: Try placing a mine on a lane lock track attribute. Your opponent will have no choice but to hit it, as they will be unable to change lanes!	
Shield You are invulnerable to attack for a short duration once the shield is active. Hint: With shield activated, wait until an opponent comes along side you and providing they do not have shield as well, change into their lane and knock them off the track! You can also drive through mines and take a direct hit from charges!	
Cool isn't it!

GAME MODES

Single Player (Championship)

The Championship game mode will give you the opportunity to play through all of the environments and tracks in the game. The start of the championship begins with the 3volt difficulty, consisting of two environments Dining Room and Bedroom.

In the first stage of the Championship you will race four tracks in the Dining Room. After each race you will be given the result of the race and the Championship rankings. In order to qualify for the next championship you must place in the top three when the final standings are shown at the end of the fourth race.

Time Trial

This is a great way to get some practice in against a ghost car. All the tracks that you unlock in the Championship will become available in the Time Trial section.

The power ups have been removed from the track allowing the player to learn the course whilst racing against a ghost car travelling around at your previous best lap time.

If you beat the best time set for this track, you can enter your name which will be saved in the Options / records table.

Custom

Once you have unlocked a few levels, why not use the custom level to change around the order of the tracks in a Championship. There are two different game modes available in Custom mode.

Championship

All tracks unlocked will be listed on the left hand side; the right hand side is currently blank. Use the up and down directional buttons to scroll through the list of tracks available and press the **X** button to select the track. The first slot on the right hand side will now contain the track you have selected. Repeat this procedure until you have selected four tracks.

If you wish to change one of the tracks placed in the tracks selected column, using the right directional button to move across to the right hand column, press the up and down directional buttons to select the track you wish to remove and press the **X** button to remove the track from the list.

Once you have selected the four tracks of your choice, move the highlight cursor to 'Ready' button in the centre of the screen and press the **X** button to start the Championship.

Special

If you are a pretty exceptional racer, these special race modes will be unlocked for you to play.
